QUESTION 2

2.1 Study the extract below and answer the questions that follow.

The importance of tourism to the South African economy and future growth cannot be underestimated.

Tourism is a large and growing part of the South African economy. It provides foreign income, jobs and household income. All South Africans are part of the tourism sector whether they are travelling away from home, hosting guests, or simply giving directions to someone in the streets. Tourism affects all communities directly and indirectly.

Tourism is currently the largest exporter and does better than gold as a foreign income earner.

Unlike other export sectors, which make products and sell them overseas, tourism brings its customers to the country. The product that is sold is South Africa itself – the people, the places, the experiences, the food and the wine.

The tourism sector and communities work together for mutual benefit.

Communities welcome visitors in the spirit of ubuntu. The tourism sector works with communities to create an attractive and safe environment for visitors and residents.

Tourism is a people's industry.

Tourism is a service-based, labour-intensive sector. An increase in the number of visitors requires more people working in the industry to serve them. The tourism sector needs skilled people who are committed to delivering excellent service.

**South Africa is committed to furthering transformation and redistribution in the tourism industry.**

[Adapted from the Department of Tourism, *Medium-Term Strategic Plan 2011/2012–2015/2016*]

Today the tourism industry still remains largely inaccessible (not available) to the majority of South African tourists. There is a growing need to make tourism more adaptable and accessible to all South Africans.

Empowerment and transformation will ensure new role-players entering the industry. Empowerment and transformation will also attract new markets and new products will be developed.

Careers in green tourism and green jobs have increased in demand because of the increase in awareness about the planet. More people are supporting environmentally friendly and green businesses, which is of benefit to the tourism industry.

It has been found that tourists are willing to spend more to stay at an environmentally-friendly accommodation. As a result of this consumer trend businesses and entrepreneurs have noted the profitability of going green. This has led to an increase in green tourism jobs.
