SECTION A  COMPREHENSION

QUESTION 1  MAKING MEANING OF TEXTS

Read the passage below and answer the questions that follow.

TEXT 1

1 I realise that all this sounds a little crazy, but psychological research on happiness backs up my strategy. Over and over, researchers studying happiness have found that the situational elements people crave – money, social status, possessions – do not reliably lead to an experience of wellbeing. By contrast, learning to find joy in the present moment (aka) focusing on experiences you truly want in your life, increases life satisfaction, improves health and allows us to live longer, more fulfilling lives.

2 My clients form my own database of sorts, convincing me that good goal-setting magic is (to use the social science terms) robust and valid. For example, when I asked Ilsa to go back in time and imagine what she once thought she would get from a successful business, she described herself with the adjectives relaxed, joyful and secure (ironically, the demands of her wildfire success made her feel tense, joyless and insecure). When she scanned her life for activities and relationships that made her feel aligned with those adjectives, she found them everywhere: in gardening, reading novels, playing with her niece. "Damn!" she told me. "I had already succeeded before I succeeded!" Indeed.

3 In Sue's case, remembering how she had expected motherhood to make her feel, yielded the adjectives loved, rejuvenated* and emotionally replenished*. She realised that her goal (having a baby who is beautiful and also busy) actually created the opposite of her adjective goal – she felt unappreciated, tired and drained. It turned out that her magical adjectives described the way she felt when connecting with old friends. Both Ilsa and Sue managed to give attention and time to the things that brought about the feelings they really wanted. (That's the beauty of adjective-based goals: They can work even when you're already suffering the consequences of unwise noun-verb spells.) Ilsa carved out time for reading and gardening; Sue put the baby in the bouncy seat and caught up with friends online.

4 These efforts helped Ilsa and Sue work and parent better, and handle the difficulties conjured by their original goals.

5 In other words, we lived happily ever after. So if you find yourself longing for some idealised goal, take a moment to go fishing for adjectives. Then use them to identify the aspects of your life that are already drawing your heart's desires. Focussing on these people and activities will lead you gently toward even more fulfilling experiences. One day, you may find yourself in a situation more interesting and delightful than anything you ever imagined.
