These marking guidelines are prepared for use by examiners and sub-examiners, all of whom are required to attend a standardisation meeting to ensure that the guidelines are consistently interpreted and applied in the marking of candidates’ scripts.

The IEB will not enter into any discussions or correspondence about any marking guidelines. It is acknowledged that there may be different views about some matters of emphasis or detail in the guidelines. It is also recognised that, without the benefit of attendance at a standardisation meeting, there may be different interpretations of the application of the marking guidelines.

Key:
- accuracy
- method
- continuous accuracy
- rounding

Topics
- F Finance
- MP Maps and Plans
- M Measurement
- P Probability
- DH Data Handling

### 3. Mr and Mrs Pillay

<p>| | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>3.1.1</td>
<td><strong>FALSE</strong>, she lies on the 25(^{th}) percentile.</td>
<td>(10) DH 4</td>
</tr>
<tr>
<td>3.1.2</td>
<td><strong>FALSE</strong>, just less than 50% were heavier than him.</td>
<td></td>
</tr>
<tr>
<td>3.1.3</td>
<td><strong>TRUE</strong>.</td>
<td></td>
</tr>
<tr>
<td>3.1.4</td>
<td><strong>TRUE or FALSE</strong>, the girl was growing a little lower than the mean.</td>
<td></td>
</tr>
<tr>
<td>3.1.5</td>
<td><strong>TRUE</strong>.</td>
<td></td>
</tr>
<tr>
<td>3.2.1</td>
<td>( \frac{22\sqrt{a}}{100\sqrt{a}} \left( \frac{11}{50} \right) )</td>
<td>(2) P 2</td>
</tr>
<tr>
<td>3.2.2</td>
<td>100 – 27.6 = 72.4%</td>
<td>(3) P 2</td>
</tr>
</tbody>
</table>
| 3.2.3 | 23.9 : 100  
\( = 239 : 1000 \) | (2) P 2 |
| 3.3 | **200 ℓ NEW GEYSER:**  
\[ = 2 \times \pi \times r \times l + \pi \times r^2 \times 2 \]  
\[ = 2 \times 3.14 \times 275 \times 1470 + 3.14 \times 275^2 \times 2 \]  
\[ = 2,538,690 + 474,925 \text{ mm}^2 \]  
\[ = 3,013,615 \text{ mm}^2 \]  
**100 ℓ OLD GEYSER:**  
\[ = 2 \times \pi \times r \times l + \pi \times r^2 \times 2 \]  
\[ = 2 \times 3.14 \times 275 \times 840 + 3.14 \times 275^2 \times 2 \]  
\[ = 1,450,680 + 474,925 \text{ mm}^2 \]  
\[ = 1,925,605 \text{ mm}^2 \]  
Therefore 1,925,605 \( \times 2 \)  
\[ = 3,851,210 \text{ mm}^2 \]  
The surface area is not doubled so Mr Pillay is incorrect. | (8) M 4 |
| 3.4 | He used the diameter measurement.  
He should have divided by two to get the radius.  
550 \( \div 2 = 275 \)  
He converted incorrectly from \( \text{mm}^3 \) to \( \text{cm}^3 \).  
He divided by 10 instead of \( 10^3 \).  
798278693.3 \( \div 1000 = 798278,6933 \)  
OR they could have followed the correct answer through  
\[ \pi \times 275^2 \times 840 \]  
\[ = 199,569,673,3 \text{ mm}^3 \]  
\[ = 199,569,67 \text{ cm}^3 \] | (4) M 4 |
### 3.5

Volume = $\pi \times 275^2 \times 1\,470$ mm

\[
= 349\,069,875 \text{ mm}^3 \div 1\,000 \\
= 349\,069,875 \text{ cm}^3 \div 1\,000 \\
= 349\,069.875 \ell
\]

(4) M 3

### 3.6

Yes, as he is getting more than 200 litres OR
No, as he is getting more than 200 litres which would add to his electricity bill

(2) M 4
### 4. Rhino Poaching

<p>| | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
</table>
| 4.1 | 1:1 For every rhino poached there is an arrest.  
OR  
1:2 For every rhino poached, two arrests are made.  
OR  
0:0 There are no rhinos being poached therefore no arrests need to be made.  
*Any sensible answer.* | (2) | DH 4 |
| 4.2 | 2011. The least number of rhinos were killed per arrests. | (2) | DH 4 |
| 4.3 | $2,75 + 1,83 + 1,23 + 0,91 = 6,72$  
$6,72 ÷ 4$  
$= 1,68$ | (3) | DH 2 |
| 4.4 | $(2,75 \times 365) + (1,83 \times 366) + (1,23 \times 365) + (0,91 \times 365)$  
$= 1003,75 + 669,78 + 448,95 + 332,15$  
$= 2454,63 \approx 2455$ OR 2454  
OR  
$1004 + 670 + 449 + 332 = 2455$  
OR  
$1003 + 669 + 448 + 332 = 2452$ | (6) | DH 3 |
| 4.4.1 | $2454,63 \times \$150 000 \times R10,61$  
$= R3 906 543 645$  
$= R3 907 000 000$  
OR  
$2455 \times \$150 000 \times R10,61$  
$= R3 907 000 000$  
OR  
$2454 \times \$150 000 \times R10,61$  
$= R3 905 541 000$  
$= R3 905 000 000$  
OR  
$2452 \times \$150 000 \times R10,61$  
$= R3 902 358 000$  
$= R3 902 000 000$ | (4) | F 3 |
| 4.5 | $946 - 333$  
$= 613$ | (2) | DH 2 |
| 4.6 | We would hope to see a small range because that would mean that less rhinos are being killed. | (2) | DH 4 |
| 4.7 | Yes. The data point lies on the zero.  
OR  
No. The increment is large and so the smaller numbers won't show on the graph. | (2) | DH 4 |
| 4.8 | Any value between (and including) 13 000 – 13 500 | (2) | DH 2 |
4.9 | Because the number of rhinos alive has dropped to below 5 000 so the number of rhinos killed will decrease as the numbers grow less and less. | (2) | DH | 4
4.10 | 2025 – 2014 = 11 years | (2) | DH | 2
### 5. Car Financing

<p>| | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
</table>
| **5.1** | R215 600 $\times$ 12,5%  
  $= R26 950$ (Interest per year)  
  R26 950 $\times$ 5 years  
  $= R134 750$ (Total interest paid)  
  R215 600 + R134 750  
  $= R350 350$  
  R350 350 $\div$ 60  
  $= R5 839,17$  
  
  If they answer:  
  (R26 950 + R215 600) $\div$ 60  
  $= R4 042,50$  
  (4 marks) |
|   |   |
| **5.2.1** | R 2 394,42 $-$ R1 911,05  
  $= R1 911,05 \times 100\%$  
  $= 25,3\%$ |
| **5.2.2** | Any logical suggestion but the best value for money will be Virgin Money. Although the monthly repayments are slightly higher, there is no excess. The lowest monthly repayment option is Budget Medium Excess.  
  (2) |
| **5.3.1** | E  
  (2) |
| **5.3.2** | D  
  R4 180  
  (3) |
| **5.3.3** | The median and lower quartile are close together which means the middle value of the data is far closer to the lower quartile than the upper quartile. 25% of the excess amounts are close to each other.  
  (2) |
| **5.4** | R2 380,75 + R980,00 + R5 839,17.  
  $= R9 199,92$  
  (3) |

**Total: 150 marks**
