Department: Basic Education **REPUBLIC OF SOUTH AFRICA** 

NATIONAL SENIOR CERTIFICATE

## GRADE 12

## MATHEMATICAL LITERACY P2

\_ \_ \_ \_ \_ \_ \_

#### **FEBRUARY/MARCH 2015**

### **MEMORANDUM**

**MARKS: 150** 

Symbol	Explanation
М	Method
M/A	Method with accuracy
CA	Consistent accuracy
А	Accuracy
С	Conversion
S	Simplification
RT/RG	Reading from a table/Reading from a graph
SF	Correct substitution in a formula
0	Opinion/Example
Р	Penalty, e.g. for no units, incorrect rounding off, etc.
R	Rounding off
NPR	No penalty for rounding

	TION 1 [ 37 MARKS]		1
Ques	Solution	Explanation	Level
1.1	Rental: R 12 600 $\checkmark$ RT $\checkmark$ MA Salaries: R 9 715 + R 6 556 = R 16 271 $\checkmark$ CA	1RT Correct rental amount 1MA adding 1CA total salaries	L3
	Packaging R 965,00 × 46,425% OR R 965,00 × (100% – 46,425%) = R 448,00 $\checkmark$ M $\therefore$ R965,00 – R448,00 = R517,00 $\checkmark$ CA	1M multiplying % 1CA decreased packaging cost	
	Telephone: R 240 × $\frac{11}{8}$ = R330 $\checkmark$ CA	1M increase in given ratio 1CA telephone cost	
	Transport cost: $\sqrt{M}$ $\sqrt{MA}$ = R 34 238 - (R 16 271 + R 517 + R 330 + R 12 600)	1M subtracting 1MA adding values	
	$= R 4 520 \checkmark CA$	1CA transport cost (10)	
1.2	January: $\frac{46487}{142702} \times 100\% = 32,58\%  \checkmark CA$	1MA Using correct values and calculating the mark up 1CA for calculating	L2
	February: $\frac{466663}{150349} \times 100\% = 31,04\% \checkmark CA$	January mark-up % 1CA for calculating February mark-up %	
	March: $\frac{59\ 046}{162\ 215}$ × 100% = 36,4% $\checkmark$ CA	1CA for calculating March mark-up %	
	The highest average percentage mark-up was in March $\checkmark O$	10 Choice (5)	

Ques	Solution	Explanation	Level
1.3	Total net income for the first quarter = R19 885 + R18 936 + R24 808	1MA total net income	L4
	= R63 629 $\checkmark$ MA Average net income per month = R63 629 $\div$ 3 = R21 209,67 $\checkmark$ CA	1CA ave. monthly income	
	Projected amount = R21 209,67 × 12 = R254 516 $\checkmark$ CA	1CA calculating estimated net income per year.	
	The projected amount is valid $\sqrt{O}$	10 validity	
	OR	OR	
	Total net income for the first quater = R19 885 + R18 936 + R24 808 = R63 629 $\checkmark$ MA	1MA calculating total net income	
	Projected amount = R63 629 $\times$ 4 $\checkmark$ CA	1CA multiplying with 4	
	= R254 516 ✓CA	1CA estimated net income	
	The projected amount is valid	10 validity (4)	
1.4.1	Handbags $\checkmark \checkmark A$	2A correct product (2)	L2
1.4.2	Width $\approx 5 \text{ cm}^{\checkmark} \text{A}$	1 A measurement	L3
	$\therefore$ Actual width = 5 × 100 cm $\checkmark$ M	1M using scale	
	$= 500 \text{ cm} \text{ or } 5 \text{ m} \checkmark \text{CA}$	1CA actual width	
		[Accept measurements from 4,8 cm to 5,2 cm] (3)	

Ques	Solution	Explanation	Level
1.5	Volume of a cylinder = $\pi \times (radius)^2 \times height$		L3
	$100 \text{ ml} = 3,142 \times (\text{radius})^2 \times 4 \text{ cm}  \checkmark \text{SF}$	1SF substitution	
	$100 \text{ cm}^3 = 12,568 \text{ (radius)}^2$	1C converting to cm <sup>3</sup>	
	$\frac{100}{12,568} = \frac{12,568(\text{radius})^2}{12,568}  \checkmark \text{MA}$	1MA simplifying	
	$7,956715468 = (radius)^2$		
	$\sqrt{7,956715468} = \sqrt{(\text{radius})^2}$		
	$2,82076505 = radius  \checkmark CA$	1CA radius	
	Diameter = $2,82076505 \times 2 \text{ cm}$ = $5,6415301 \text{ cm} \checkmark \text{CA}$	1CA diameter (5)	

5 NSC – Memorandum

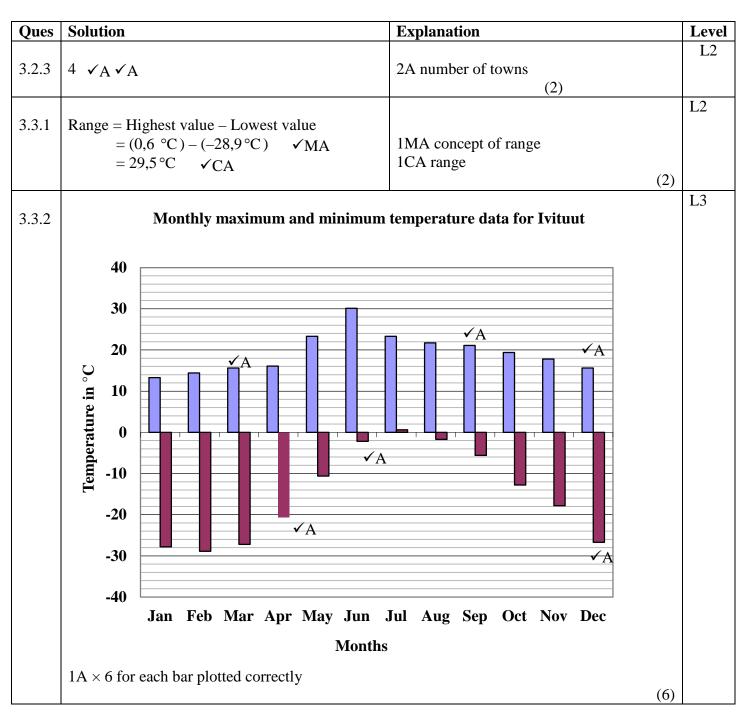

Ques	Solution	Explanation	Level
1.6.2	Approximately 540 km ✓✓ RG	2RG values between 520 km and 575 km (2)	L3
1.6.3	Toyota Yaris: Approx R2 390 ✓ RG ✓ O	1RG reading correct value 10 for choice	L3
	The Toyota Yaris will be the cheapest when travelling a distance of 1 850 km	(2)	

QUESTION 2 [31 MARKS]			
Ques	Solution	Explanation	Level
2.1.1	South West $\checkmark \checkmark A$	2A direction (2)	L2
2.1.2	Aqua scene ✓ A Darwin Entertainment Centre ✓ A	1A for each of the places of interest	L2
2.1.3	$\checkmark$ ATurn left into McMinn Street continue till reaching Stuart HWY. $\checkmark$ ATurn right onto Stuart HWY continue till you reach Bagot Rd. $\checkmark$ A $\checkmark$ ATurn left onto Bagot Rd continue north and at Rapid Creek, turn leftonto Trower Rd. Proceed on this road till you see the shopping centreon your left hand side.	(2) 1A left into McMinn Street 1A right Stuart 1A left Bagot 1A left Trower (4)	L2
2.1.4	Distance = average speed × time 12,4 km = average speed × 18 min ✓ SF 12,4 km = average speed × $\frac{18}{60}$ hours ✓ C Average Speed = $\frac{12,4 \text{ km}}{\frac{12,4 \text{ km}}{60}}$ = 41,3 km/h ✓ CA ✓ O The travel time is due to slow traffic flow since an average speed of 60 km/h is normal in built up areas.	1SF substitution 1C conversion 1CA average speed 1O justification	L4
	60 km/h is normal in built up areas.	(4)	

Ques	Solution	Explanation	Level
2.2.1	ATM cash withdrawal fee for $R500 = R \ 3,50 + 1,1\%$ of value = $R \ 3,50 + 1,1\% \times R500  \checkmark SF$ = $R \ 9,00  \checkmark CA$	1 SF Using correct fee	L4
	Four ATM cash withdrawals of R500 each = $4 \times R9,00 = R36,00$	1CA Calculating fee	
	Five debit orders = $5 \times R12,00 = R60,00$ $\checkmark$ CA	1CA Calculating fee	
	Seven debit card purchases = $7 \times R0,00 = R0,00 \checkmark A$	1A no fee for debit	
	Cash Deposit fee (in branch) = R 11,00 + 1,35% of value = R 11,00 + 1,35% × R4 500 $\checkmark$ SF = R 71,75 $\checkmark$ CA	1SF correct formula 1CA amount	
	Monthly fee = $R36,00 + R60,00 + R0,00 + R71,75$ $\checkmark$ MA = $R167,75$ $\checkmark$ CA	1MA adding values 1 CA monthly fee (9)	
2.2.2	Number of times more $= \frac{R167,75}{R53}$ MA = 3,165 $\checkmark$ CA $\approx 3$	1MA calculating the number of times 1CA the rounded value	L4
	More than three times the minimum monthly fee Elizabeth was correct.	10 verification	
	OR	OR	
	✓ M $3 \times R53 = R159$ ✓ CA R167,75 is more than three times the minimum monthly fee Elizabeth was correct ✓ O	1M multiplying 1CA the amount 10 verification	
2.2.3	Fixed monthly option = R 104,00 Four ATM cash withdrawals of R500,00 each = R0,00 Five debit orders = R0,00	(3)	L2
	Seven debit card purchases $= R0,00 \checkmark A$ One cash deposit of R 4 500,00 each $= R0,00$ Monthly fee = R104,00 \checkmark A	2ACost of transactions 1A for fee of R104,00 (3)	
2.2.4	She can use her bank/debit card to pay for these goods and services. $\checkmark \checkmark O$	2 O reason	L4
	Once-off withdrawal equivalent to four times the weekly amount spend to deduct each month.	2 O reason (4)	

-	Solution	Euplanation	Long
Ques	Solution	Explanation	Level
3.1.1	$2\ 655\ \text{km} : 1\ 650\ \text{miles}$ <b>OR</b> $2\ 655\ \text{km} : 1\ 650\ \text{miles}$ $\frac{2\ 655\ \text{km}}{2\ 655\ \text{s}} : \frac{1\ 650\ \text{miles}}{2\ 655\ \text{s}} \checkmark \text{MA}$ $2\ 655\ \text{km} : 1\ 650\ \text{miles}$ $\frac{2\ 655\ \text{km}}{2\ 655\ \text{s}} : \frac{1\ 650\ \text{miles}}{2\ 655\ \text{s}} \checkmark \text{MA}$ $\frac{2\ 655\ \text{km}}{1\ 650\ \text{s}} : \frac{1\ 650\ \text{miles}}{1\ 650\ \text{s}} \longrightarrow \text{MA}$ $1\ \text{km} = 0.6214\ 6892\ 66\ \text{miles}$ $1.6090909\ \text{km} = 1\ \text{mile}$ $1\ \text{km} \approx 0.6215\ \text{miles}$ $\checkmark\ \text{S}$	1MA dividing 1S simplification (2)	LS
3.1.2	Greenland is an irregular shape, $\checkmark \checkmark O$ and it is not a rectangle.	20 explanation (2)	L4
3.1.3	$\checkmark A$ April 6 days + May 31 days + June 30 days + July 31 days + $\checkmark A$ August 18 days = 116 days $\checkmark C A$ The midnight sun lasts 116 days	1A 6 days in April 1A 18 days in August 1A rest of the months 1CA total days (4)	L3
3.2.1	Population density = $\frac{\text{Total number of persons living on the island}}{\text{ice-free area}(\text{in km}^2)}$		L3
	$=\frac{56\ 370\ \text{persons}}{2\ 166\ 086\times 19\%\ \text{km}^2} \checkmark A$	1SF substituting 1A 19 %	
	$= \frac{56370 \text{ persons}}{411556,34 \text{ km}^2} \checkmark CA$ = 0,1369678815 persons/km <sup>2</sup>	1CA ice-free area	
	$\approx 0,1 \text{ persons/ km}^2$ $\checkmark CA$	1CA population density (4)	
3.2.2	Number of indigenous persons living in Nuuk in 2003 $\checkmark A$ $= 75\% \times 9\ 000 \ \checkmark RG$ $= 6\ 750 \ \checkmark CA$	1A 75 % 1RG number of inhabitants [accept values from 8 000 but less that 10	L3
		000] 1CA number of indigenous persons (3)	

10 NSC – Memorandum

Question 4 (27 marks)			
Ques	Solution	Explanation	Level
4.1.1	$P = \frac{342\ 171}{1300\ 771} \stackrel{\checkmark}{\checkmark} A$ $\approx 0.263 \stackrel{\checkmark}{\checkmark} CA$	1A total light vehicle learner licenses 1A total number of learner licences 1CA probability in decimal form (3)	L3
4.1.2	Gauteng: $102 \ 191 : 293 \ 094 \qquad \checkmark  A$ $1 : \frac{293094}{102191} \qquad \checkmark  MA$ $\therefore  1 : 2,868 \qquad \checkmark  CA$ Limpopo: $8 \ 234 : 98 \ 151$ $1 : \frac{98 \ 151}{8 \ 234}$ $\therefore  1 : 11,925 \qquad \checkmark  CA$ $\checkmark  O$	1A working with the correct values 1MA dividing to find unit ratio 1CA simplification 1CA simplification 10 comparison	L3
	The ratio for Limpopo is higher than for Gauteng	(5)	L2(2)
4.1.3	Gauteng: $\frac{415818}{1300771} \times 100\%$ $\approx 32\% \checkmark CA$ Limpopo: $\frac{107702}{1300771} \times 100\%$	1CA percentage	L2(2) L4(2)
	$\approx 8,3\%$ $\checkmark$ CA $\checkmark \checkmark$ J The population of Limpopo is less than that of Gauteng. OR The main mode of transport in Coutons is core	1CA percentage 2J reason	
	The main mode of transport in Gauteng is cars. OR Any other valid reason	(4)	
4.1.4	She needs to compare the number of learners who passed the Light Motor vehicle licence to the total number of learners who wrote the test for light motor vehicle licence. <b>OR</b> Table 4 data cannot be used to calculate the probability of passing	3J reason	L4
	OR		
	Incorrect data/wrong data was used	(3)	

12 NSC – Memorandum

Ques	Solution	Explanation	Level
4.2.1	Drivers have very little driving experience. $\checkmark \checkmark O$	20 explanation	Level L4
		(2)	
4.2.2 (a)	<ul> <li>Amount to be paid by Keitumetse</li> <li> <ul> <li>compulsory excess payment of R2 000.</li> <li>payment of R 1 000 for being under 25 years old. ✓ A</li> <li>payment of R2 000 for drivers' licence of less than 2 years.</li> </ul> </li> </ul>	1A for R2 000 1A for other 2 amounts	L3
	Total excess to be paid = $R5\ 000$ $\checkmark$ CA	1CA the total amount	
	Percentage of claim amount = $\frac{5000}{13400,50} \times 100\%$ $\checkmark$ M $\approx 37,31\%$ $\checkmark$ CA	1M calculating percentage 1CA percentage of his claim (5)	
4.2.2 (b)	Amount to be paid by Keitumetse's father - Payment of R2 000 for the compulsory excess. RT	1RT the amount	L4
	Insurance compensation = value of damage – excess value = R13 400,50 – R2 000 = R11 400,50 $\checkmark$ MA $\frac{11400,50}{13400,50} \times 100\% = 85\% \qquad \checkmark CA$	1MA the total payable 1M percentage calculating 1CA percentage	
	$\begin{array}{c} 13400,50 \\ \text{He is correct; it is more than 80\%.} \end{array}$	10 verification (5)	

Ques	TION 5 [30 MARKS] Solution	Explanation	Level
5.1.1	Median = $\frac{P+55}{2} = 55$ $\checkmark$ M $\therefore P = 55$ $\checkmark$ A	1M concept of median 1A value of P	L3
	Mean = $\frac{\text{sum of the marks}}{\text{total number of students}}$ $49,25 = \frac{1124 + Q}{24} \checkmark CA$ $1182 = 1124 + Q \checkmark S$ $\therefore Q = 58 \checkmark CA$	1CA the sum 1124 1S the total 1182 1CA value of Q (5)	
5.1.2	P <sub>(less than 80%)</sub> = $\frac{21}{24}$ ✓ CA = $\frac{7}{8}$ OR 0,875 OR 87,5% ✓ S	1CA probability 1S simplification	L2
	8	(2)	
5.1.3	Group A: Quartile 1 = 28 Quartile 3 = 75 $\checkmark$ RG Inter quartile range = 75 - 28 = 47 $\checkmark$ CA Group A: 23+33 2 = 28 23+33 2 = 28 CR	1RG estimate the value Q1 1RG estimate the value Q3 1CA the IQR	L3(5) L4(2)
	Group B: Inter quartile range = $70 - 30$ = $40 \checkmark A$ $\therefore$ Group B has a lower inter quartile range $\checkmark O$ $\checkmark A$ $\therefore$ Group B performed better because they have a higher median and a smaller inter quartile range $\checkmark O$	<ul> <li>1A group B IQR</li> <li>1O comparing IQRs</li> <li>1A comparing the median percentages</li> <li>10 completing group B did</li> </ul>	
	median and a smaller inter quartile range. $\checkmark$ O	10 explaining group B did better (7)	

Ques	Solution	Explanation	Level
5.2.1(a)	$\checkmark$ A Both the bath room door and Bedroom 2 door must open to the inside and not the outside as on the plan. $\checkmark$ O	1A identifying the doors 1O explanation	L4
	If the doors open to the outside the open doors covers the entrance to Bedroom 1 and the master bedroom	10 explanation (3)	
5.2.1(b)	✓ O The toilet pans are positioned against the interior walls which make the sewer pipes to run in the walls or under the foundation, which is against building regulation. ✓O The toilet pans must be positioned next to exterior walls for the sewer pipes to go through the wall. ✓ O The master bedroom toilet pan must be moved to the exterior wall next to the window.	10 identifying the position of the toilet pans 20 alternative position	L4
		(3)	
5.2.2	Family Room and Kitchen ✓✓ O	20 identifying the rooms (2)	L4
5.2.3	Actual length = $33 \text{ mm} \times 125$ = 4 125 mm = 412,5 cm ✓ CA Actual breadth = $28 \text{ mm} \times 125$ = $3500 \text{ mm} = 350 \text{ cm} \checkmark \text{CA}$	1A using scale 1CA length 1CA breadth 1C converting	L4
	Floor area of the room in $cm^2 = length \times breadth$ = 412,5 × 350 = 144 375 $\checkmark$ CA $\therefore$ minimum area of the window in $cm^2$ = 144 375 × 11,5% = 16 603,125 $\checkmark$ CA	1CA area of room 1CA area of the window	
	Area of the window in $cm^2 = width \times height$ 16 603,125 = 220 × height	Terr area of the window	
	$\therefore \text{ height in cm} = \frac{16603,125}{220} \checkmark \text{M}$ $= 75,46875$ $\approx 75 \checkmark \text{CA}$	1M finding the height 1CA rounding off	
		(8)
